2. Instructions for use

※ Operation Instructions for RSL400400 Skylight.

1. When opening the window cover, press and hold the red buttons on both latches, turn the handle, and gently push the window outward. (Note: The support rod is an air spring structure. The window can be pushed open by pulling the aluminum rod gently upward.)
2. The curtain components are composed of a sunshade curtain and an anti-mosquito net, and the rolls at both ends contains magnetic strips. Apply only light force when pulling the rolls.
3. When closing the window, check that the sunshade and anti-mosquito net are properly put away. Then pull the handles on the latches to close the window. Then press and hold the red buttons on both latches and turn the handle to lock the window.
