# Compact Electrical Dehumidifier

Information for use \_\_\_\_\_

---

## Intention For Use

Thank you for purchasing this compact dehumidifier from Leisurewize. This energy efficient dehumidifier that can extract up to 400ml of water is intended for extracting excess moisture in the air to prevent build up of mould, mildew, condensation and odours. It is suitable for use around your home, your caravan or motorhome. It can be placed in kitchens, bathrooms and wardrobes and other places where there is usually build up of moisture.

The dehumidifier comes with a removeable water tank that can hold up to 1.3L of water.

Before using this product, we recommend that you read all the information in this document. Please keep this manual for future reference.

---

## Product Elements

1. LED indicator
2. On/Off Button
3. AC power inlet
4. 1.3L Removeable tank
5. Air outlet vent
6. Air inlet vent
7. Handle
8. Hydraulic cut-off
9. Water displacement hole
10. Removeable water tank
11. Mains (AC) power cord
12. AC connector

---

## Installation Instructions

Please make sure you are familiar with all the health & safety guidelines below prior to using the product.

- After using the compact dehumidifier, please switch the unit off, unplug it and store in a dry place.
- When using the compact dehumidifier, always ensure both the air inlet and air outlet vents are free from obstruction.
- Never submerge the dehumidifier into water. This product is ONLY designed for extracting moisture from the air.
- This product is not a toy. Please keep children supervised at all times when they are near this device.
- Do NOT use this product for anything other than its intended purpose.

---

## Where to Place the Dehumidifier

It is best to place the dehumidifier in areas where there will be excess moisture in the air. This includes bathrooms, kitchens and areas where it is damp.

Place it as near as you as can to the source of damp or moisture

**IMPORTANT:** When being used in a wardrobe/cupboard, please keep the wardrobe/cupboard open.

**WARNING:** NEVER SUBMERSE THIS DEHUMIDIFIER IN WATER. THIS DEHUMIDIFIER IS DESIGNED TO EXTRACT MOISTURE FROM AIR.

---

## Usage Instructions

**Please note:** This dehumidifier is not intended for prolonged use. To avoid the risk of freezing, use it for up to one hour at a time and wait up to two hours before using it again.

1. On first use, remove the product out of its packaging. Please dispose of the packaging in the correct manner.
2. Connect the dehumidifier to a mains power source. The power cable must be inserted into the AC power inlet (3) first and then connect the power cable to a mains power socket.
3. Switch on the mains power supply.

---

## Emptying the Water Tank

1. When the water tank is full, with approximately 1.3L of water collected, the dehumidifier will switch off automatically (via the hydraulic cut-off) and the “ Red“ LED (1) will be on.
2. To remove the water tank (10), first switch off the compact dehumidifier using the switch (2). Then, remove the water tank from the unit and pour the water out, through the water displacement hole (9). Return the water tank back to the dehumidifier. If you wish to continue extracting excess moisture from the air, switch the unit on again.

---

## Maintenance & Care

Before cleaning the dehumidifier, please turn off the unit and unplug it from the mains socket. Then, with a piece of soft cloth, clean the surface of the product. A cleaning brush can be used to wipe the dust off the grills of the air vents.

### Disposing Of The Battery

When the dehumidifier's battery is completely run down, it should be taken to your local refuse centre where they will accept old batteries for recycling. Please do not burn the battery to dispose of it as this could result in an explosion. Never expose the dehumidifier to intense heat or fire - risk of explosion.

The WEEE symbol  on this product means that this product should be ethically dismantled or recycled to minimise environmental impact. Please check with your local authority for more information.

# Technical Specifications

<b>Product Title</b>	Compact Electrical Dehumidifier
<b>Supplier Code</b>	LW573
<b>Capacity</b>	Approx. 400ml per day at 25°, 85% RH (Relative Humidity)
<b>Cooling element</b>	Thermo-electric Peltier module
<b>Fan</b>	90mm×90mm DC FAN
<b>Voltage</b>	230V AC~
<b>Power</b>	48 Watts
<b>Removable water tank capacity</b>	1.3 Litres
<b>Water Level Detector</b>	Automatic switch off with “Red” LED Indicator when water tank is full
<b>Product Dimensions</b>	183mm (W) × 288mm (H) × 129mm (D)
<b>Working environment</b>	Over 15 °C, over 40% RH
